Welcome to the Colourwise Stationery, Office Supplies & Office Furniture Style House Guidebook 2016

# Natural House Fun House Vintage House

**Contemporary House** 

This booklet defines 4 different design styles using images, colours, materials and words:

- 1. Natural House
- Vintage House (Old School + French Style)
- 3. Contemporary House
- 4. Fun House

Each Style House is distinctive. Unique design elements, colours, textures and materials define each look, from furniture to accessories and stationery.

Each Style House offers the consumer a complete package. Coordinated products inspire the consumer to pick and choose individual products knowing they will all look great together and also reflect the consumers individual style.

Whilst each Style House has it's own collection of colours and materials, there are some which overlap from style to style. Take a white desk for example –this could work in the

Natural House, Contemporary House or Fun House styles. When teamed with a certain style of chair, desktop accessories and or storage items, the simple white desk transforms into a design statement.

There are also elements from one style that will work with another. For example, fluoro yellow accessories from the Fun House could be used to lift the look and feel of the Contemporary House or Natural House styles.

Throughout the document there are simple guides and labels that help define the look and feel of each style, including a colours and materials palette. By sticking to the palette and design details as pointed out, it will be easy to achieve 4 distinct styles which have instant appeal to your customers.

### **Old School**

- » A time of reflection and a slower pace. Care and dedication are given to the things around us and the work that we do.
- » A time when clocks still ticked and their rhythm set the pace.
- » Masculine and feminine themes blend to create a feeling of heritage and exploration.
- » Sepia tones, aged timbers and the comfort of time worn leather. Copper and brass show the glow of rubbed patches in evidence of use over time.
- » Cartography highlights past discoveries and the journeys to come.
- » Metal finishes complement warm wood tones, locking in a strength and sense of agelessness.

### French Style

13

- » Mirroring this deep masculinity is the feminine fragility of a French salon. White painted woods, turned timber legs and delicate pastels. Scented letters feature scrolling calligraphy and are sealed with wax.
- » Precious items are sprinkled with care on cool white surfaces.
